

BIOSVALES AND RAIN GARDENS

Stormwater management is a hot topic. Thoughtful plant selection can help create landscapes that mitigate destructive flooding.

North Pole[®]

THUJA

Durable arborvitae comes in many sizes and shapes, and works well in bioswales and rain gardens. *page ?*

Little Henry[®]

ITEA

Our native sweetspire will happily fill in boggy areas, yet established plants are also drought-tolerant. *page ?*

Vanilla Spice[®]

CLETHRA

Another great native plant that is adaptable to wet sites. *page ?*

Arctic Sun[™]

CORNUS

Colorful red-twig dogwood grows naturally in soggy areas. *page ?*

Sugar Shack[™]

CEPHALANTHUS

Native to the banks of streams and ponds, this native plant is ideal for rain gardens. *page ?*

BIOSVALES AND RAIN GARDENS

Berry Heavy®

ILEX VERTICILLATA

Our native winterberry holly brightens winter landscapes, and is very adaptable. *page ?*

Black Lace®

SAMBUCUS

Elderberry will tolerate wet conditions, and windy ones. *page ?*

Blue Muffin®

VIBURNUM DENTATUM

This native viburnum is extremely adaptable, including both wet and dry sites. *page ?*

EROSION CONTROL

Woody ornamentals are an excellent long-term solution to controlling erosion.

Arctic Fire™

CORNUS

The spreading nature of our native *Cornus stolonifera* helps it to stabilize sites. *page ?*

OSO EASY® FRAGRANT SPREADER

This fast growing, fragrant rose is also very disease-resistant. *page ?*

Little Henry®

ITEA

Itea's ability to sucker helps it to flood banks and beds. It will grow in sun or shade. *page ?*
