

INSERTS & CONTAINERS

NEW FOR SPRING 2024

We're expanding our popular line of self-watering AquaPots® with the addition of two AquaPots Lite collections and AquaPots Inserts. High-end resin and volcanic ash composite planters provide a lightweight, affordable option and work seamlessly alongside our AquaPots Ceramic collection.

The AquaPots Insert works in conjunction with AquaPots Lite and consumers' existing containers to make them self-watering. The 13.5" insert holds 2.9 gallons of water and fits round containers with a drainage hole; an optional square fitting makes it work in square pots. AquaPots Lite Inserts are available in cases of four. Find pricing for the planters (including inserts) and the inserts only below.
